

# Beyond Clickers — A Web-Based System for Lecturing

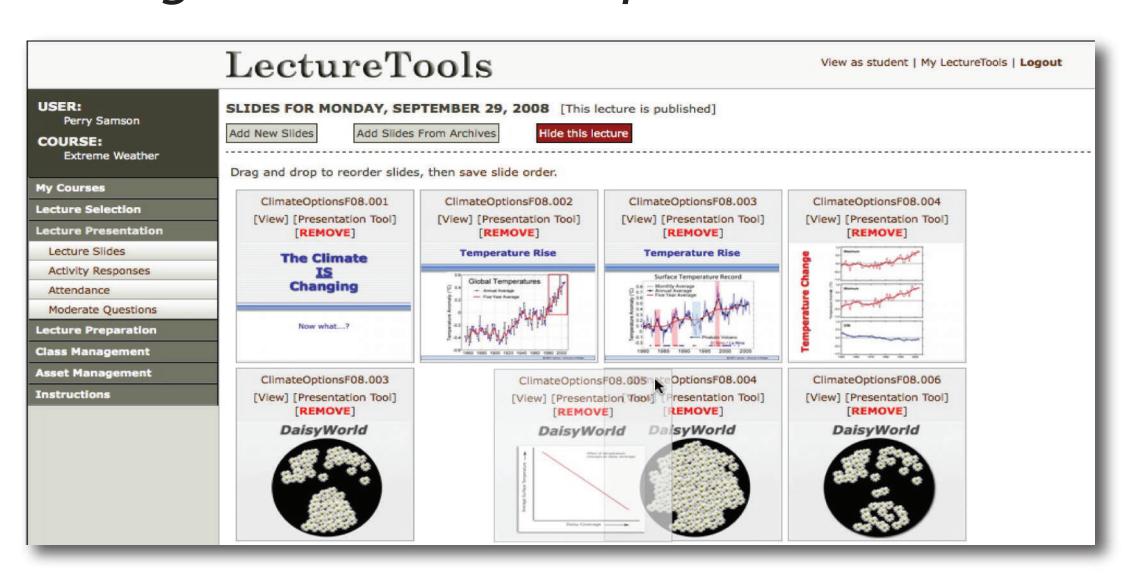

http://www.lecturetools.org

Perry Samson [samson@umich.edu] Atmospheric, Oceanic & Space Sciences

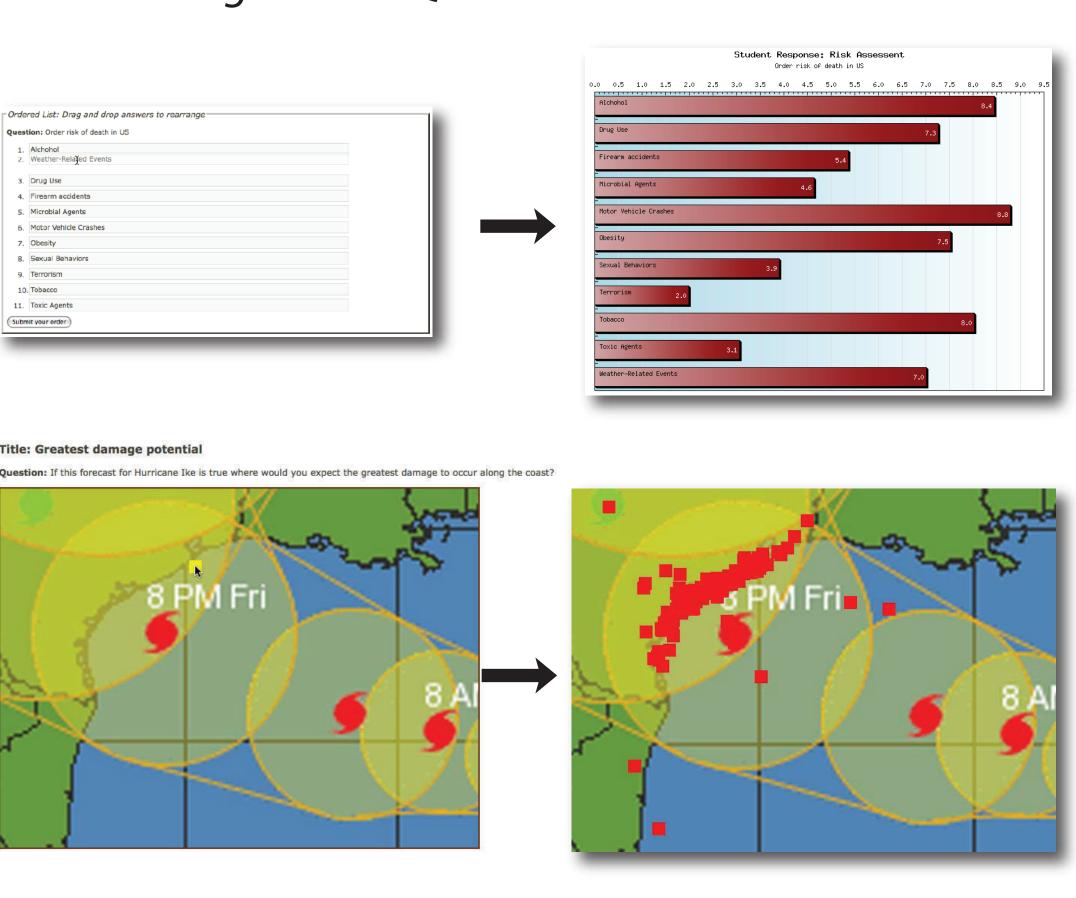

## **Benefits to Instructors**

1. Organize Lecture Preparation

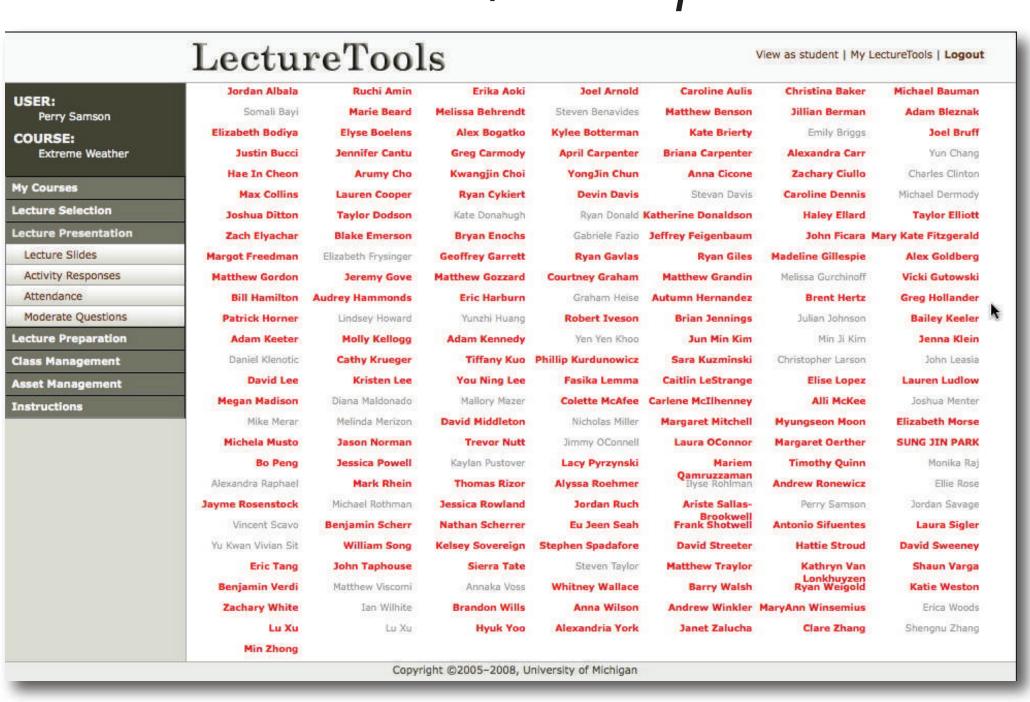

## 2. Easily Add Response Questions

- Multiple Choice
- Ranking Questions
- Association Questions
- Free-Response Questions
- Image-Based Questions

## 3. Track Attendance/Participation

## **Student Functions**

- 1. Organize Lecture Material
  - Move between courses
  - Note-taking synchonized with lecture slides.
  - Annotate lecture slides and save.
- Play podcasts (optional).

#### 2. Interact within Lecture

- Indicate comfort with material.
- Participate in active response system.
- View questions posed by others (anonymously).
- Pose questions.

#### LectureTools My LectureTools | Logout Play Podcast | G **USER:** Lecture Slides for: Wednesday, April 9, 2008 Rate My Notes Extreme Weather My Courses → Matter of the following of the fo **Lecture Selection** LECTURETOOLS QUESTIONS **This Lecture** Tornadoes, Lightning 2: Do you know if there will be an in-class activity on Friday? Lecture Slides wouldn't count it out Activities Q: i would like to be a leader in a focus group but i only have one person in my group so far. what can i do to find more people? Animations make new friends with the people sitting around you Print Lecture Q: Do you know what the guest lecture will cover? and Hail Links tornado and storm chasing Instructions 2: How long did it take you to grow that AWESOME Fumanchu haha, it's kinda scary...but it didn't really take long Q: have you talked to Perry about the weather dance points? Oh my... it should be within 24 hours : What causes the draft to tilt? a storm is just so large, that when the air is either moving up in an Your notes 1 have been saved. Draw on this † slide updraft or moving down in a downdraft, the horizontal wind can move Ask a question it so the updraft or downdraft become tilted Ordered List: : what are derechos? Tornado bearing down here is a little more info if you didn't catch it in class http://en.wikipedia.org/wiki/Derecho A tornado is on the ground in your town you should (rank) : How come we dont have any assigned readings for the 3rd 1. Go to the southwest corner of basement exam/ last 3rd of the course? Those really helped me to nderstand the material. Go to northeast corner of basement Open windows 'll pass this comment onto perry, you can still read through the related parts of the book, but we'll see if we can change that. Close windows Jump into bathtub Hide under bed Run like banshee 8. Drive like banshee This scale of tornado is entry level and while menacing, not particularly destructive. Fujita Scale: F0 Maximum Typical Effects Wind Speeds Gale Tornado. Light Damage: Some damage to chimneys; breaks twigs and branches off tress; pushes over shallowrooted trees; damages signboards; some windows broken; hurricane wind speed begins at 73 mph.

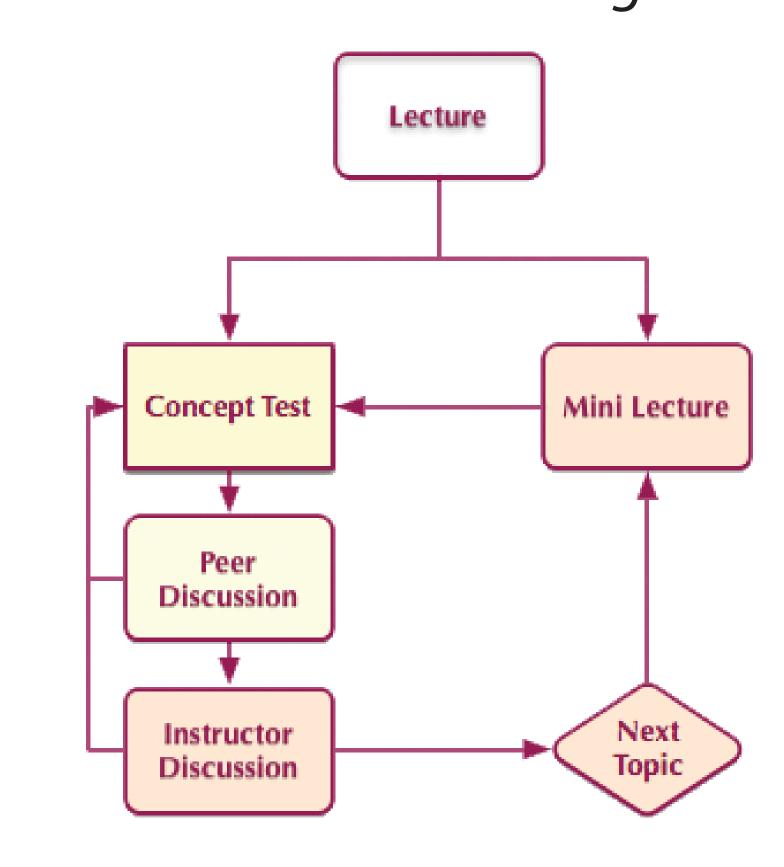

### Presented at the Third Annual Research and Scholarship in Engineering Education Poster Session. 10/14/08.

## **Impacts**

1. Promotes "Active Learning"

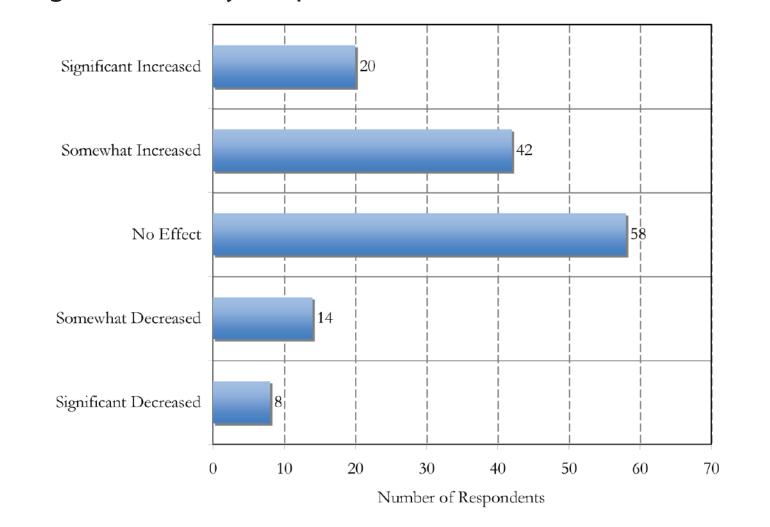

#### 2. Shift in Class Mechanics

How often do you use a laptop in your classes?

	I don't take any notes	Hand write notes	On my computer, but not using LectureTools	On my computer using LectureTools	
Rarely	8	1	1	3	13
Some class	1	7	1	13	22
Most class sessions	5	16	8	61	90
Every class <sub>=</sub>	0	14	2	22	38
	14	38	12	99	

How do you feel that your use of laptops in this class has changed the time you spend on tasks unrelated to the lecture?

How do you feel that your use of laptops in this class has affected your learning in this course?
